

ANTIOXIDANT COMPOSITIONS AND METHODS OF USE THEREOF

ABSTRACT

An antioxidant composition having enhanced oxidative
5 stability, emulsion stability, and health benefits. The
composition may include individual ingredients or a
synergistic blend of non-reducing sugars, sugar polyols,
medium-chain triglycerides, polysaccharides, polyphenols,
phospholipids, chitosan, and alpha-casein, beta-casein, kappa-
10 casein or protein fragments, glycopeptides, phosphopeptides.
The composition may optionally be further utilized for the
prevention of hypercholesterolemia or bone mineral loss.
